## DIGITAQ IN NATIONAL SCIENTIFIC WEEK DESSIMINATION AND EXPLANATIONS

We would like to express our gratitude to our university, represented by Professor Debabeche Mahmoud, for organizing this scientific week. During this week, invited professors have animated several conferences on AI and its application, several scientific competitions were organized to select best startups, best thesis, best researchers and master students have exposed our products to the public, this week is an opportunity for us to disseminate the DIGITAQ project with a large public.

### WOULD YOU INTRODUCE YOUR TEAM?

Our team is headed by professor Debabche Mahmoud and it is composed of four other persons: MR Mohamed Moummi who is also the responsible of Erasmus+ program in our university, Miss Gettaf Asma Temmam, Dr Soheyb Ayad and me.

### WHAT INTERESTS YOU ABOUT THIS PROJECT?

This project is very important for the university on several levels: (1) it is a kind of training for all partners to realize capacity building Erasmus+ project, which mean train professors of the universities to initiate and achieve collaborative projects, (2) for computer science professors, the project allow them to examine the digitization of the quality insurance in higher education, and how the processes approach is applied to develop this kind of system, and (3) the platform which will be realized will be very useful and will be added to the set of available tools transforming our society to digital society.

### CAN YOU TELL US ABOUT THIS PROJECT ?

The Digitaq project is about capacities building project which aims to provide the ability of manage the quality insurance in higher education system in Algeria. The concrete objective is to provide a digital information system which supports the quality insurance in our universities.

**CAN YOU TELL US ABOUT THE PROGRESSION OF THE PROJECT?**

Yes. The project progresses well. Lot of deliverable are provided and are available which describes lot of aspects of the project, like quality plan, dissemination plan, etc. On the other hand, the development of the platform is also progressing. The use processes approach was adopted to guarantee the inclusion of quality insurance. An active development team is exploring lot of solution to insure the success of this project.

**WE WANNA KNOW THE ACTUAL ROLE OF BISKRA TEAM?**

The central task of DIGITAQ Biskra Team is to realize the work-package 4 which is concerned basically by the insurance of quality of the realization of the project itself. In this package, we are responsible with Liège university to provide internal and external evaluations. Internal evaluation concerns the surveillance and evaluation of all activities like meetings, delivered documents, products, etc. The external evaluation concerns also all the project and is assigned to a selected expert who is chosen by the partners. However, the team also is committed in the other package and it supports the other partners in tasks like: development, dissemination, etc

**WHO ARE THE PARTNERS IN THIS PROJECT ?**

This project is realized by fourteen partners, nine universities from Algeria, four from Europe, and the project is also agreed by the ministry of higher education. This last one is also a partner in the project. The final product of the project will be under the control and use of the ministry.

**IF THIS PROJECT CONCERNS INFORMATION SYSTEM THAT MANAGES THE QUALITY IN HIGHER EDUCATION, WHAT ABOUT SECURITY AND PRIVACY OF DATA IN THIS SYSTEM?**

Yes, this is very important question. Indeed, in this project we have cared a lot about security issues. For that reason, several solutions are being discussed like blockchain, cryptographies, etc. We think that the Digitaq project will be equipped with the set of security tools to insure privacy of data.

**MAY YOU TELL US ABOUT YOUR OPINION ABOUT THIS PROJECT?**

I think that his project is very important for our universities in all Algeria. It will help to provide digital solution to insure the quality in our higher education establishments.

Thanks to the realized dissemination video, the students have been aware about this project and they are passionate to know more about it and to see its platform functioning.

We would like all students who knew what this project is and become really interested in this project, visit our facebook page and put for us any note .

follow us on facebook : [DIGITAQ](#)  
facebook : [DIGITAQ\\_usto](#)

For example I will put : i am very happy that this project will be in Algeria, and what caught my attention is that the colors of the logo are the same as the flag colors of Algeria.
